

ANIMALS

SCIENCE YEAR 5
UNIT 3

Animals that lay eggs ensure their survival of species through:

- ❖ **Laying a lot of eggs**
Eg: Flies, mosquitoes, turtles, fish, frogs
- ❖ **Hiding eggs**
Eg: Lizards, grasshoppers, cockroaches, crocodiles, turtle
- ❖ **Eggs covered with slimy and stinky mucus** Eg: Frogs, fish
- ❖ **Nurture their eggs**
Eg: Chickens, birds, penguins
- ❖ **Taking care of their eggs** Eg: Snake,

Animals take care of their young to ensure their survival of species through:

- ❖ **Suckle their young**

Eg: Cats, tigers, cows, monkeys, orangutans

- ❖ **Feeding the young** Eg:
Birds, lions

- ❖ **Carrying young in pouches**
Eg: Kangaroos

- ❖ **Moving in groups**
Eg: Elephant, swallows

- ❖ **Attacking enemies that disturb their young**
Eg: Hen, cats
- ❖ **Carrying young on their body**
 - **Eg: Scorpions**

Why animals need to protect themselves?

- To avoid being eaten by other animals
- To avoid being harmed by humans.
